## 2019 CRIR House Workshop, Christiania, Copenhagen

Since 2004 the CRIR house has hosted researchers from around the world with a particular interest in Christiania as a research area. Christiania's insight and experience into local organisation, alternative architecture, lifestyle, culture, sustainable environments, quality of life, democracy and innovation is unique in the world and could generate important knowledge that may inspire new urban thinking.

The steering group has decided to give the present CRIR house a major makeover and we have involved local kids from the youth club on Christiania along with former users of the CRIR house in this work.

We had the email adresses of 120 former CRIR us-

#1 - Design with respect for what is already there. Keep the bohemian spirit. Looks bad from outside but works well from inside. Improvements with charm, quirks and sustainability. Add more space and amenities to make the stay more pro-

#2 - Small annexe as a meeting place or exhibition. A winter garden instead of balcony also to avoid noise - neighbours. Studio with good light

The quick - and intuitive - first reactions. Kids were asked to put a green post it on what they liked and a red (cyan) one on what they disliked. No explanations needed as a starting point

#1 - The big south facing window. View to the trees

#2 - Mezzanine for sleepng as an offshoot out of the building - Risk of hurting your head

Based on the first individual exploration without

#1 - Terassa with a roof. A good place to have guests but also a problem with noice for the neighbours

words, the next step was small groups each with one instant cameras. The most important observations were selected and commented on.

#2 - Big bright window - with a view to the green outside. The window sill is perfect to sit on.

Second exploration with kids using instant photos and adding words to them

TOWN SO THE PARTY OF THE PARTY

#1 - The stairs - Cool - no edges and a bit dangerous. Good with stones as material. Looks good difficult to build.

EU UZ

#2 - The mural - cool mural - many colours

A "completely normal house" where a tower is for a bedroom with both peace and a view. Next to the tower is a space for a pet. The design have been decided along the way and perhaps quite close to the offshoot style of Christiania houses in general.

A series of houses that forms a small town.

Part of the workshop with users - onSite in the CRIR house - was a classic brainstorm to get new ideas that was grouped and prioritised.

#1 - CRIR should be a more active part of Christiania and Mælkebøtten. Reflecting local needs. Sharing and adding ressources to the community

#2 - The new house should have a space for social interaction. More space for family or collaborators. A semipublic space for meetings and exhibitions
